

Strategic Planning

Solutions by Harthcock Associates

Why It's Important

The best way to predict the future is to create it! Strategic Planning is a process that helps any organization (no matter what size or industry) create their future while determining what organizational resources will be needed to create and ensure their future success.

Organizational leaders have found that developing a strategy and an implementation plan is far more effective than leaving future results to chance. Creating a strategy based on a foundational vision and mission, grounded in core values allows the organization to create a plan of action that can lead to long-term and sustainable success.

If the plan is implemented well and is communicated to every team member and contributor, it will fuel higher levels of motivation and commitment. If every team member and contributor understands how their outcomes and productivity impacts the success of the plan, they will be far more committed to do what is necessary to help see the organization's vision realized.

The Results Will Be Meaningful & Measurable

- Increased Market Share
- Stronger and More Productive Teams
Stronger Utilization of Intellectual Capital
- Increased Shareholder Earnings
- Increased Customer Loyalty
Enhanced Culture and Identified Values
Higher Levels of Motivation
